Advanced BlueBio Training Course 24th -26th October 2023

In the context of exchanging knowledge among the EU projects and building a strong network for collaborations Dr. Fengou participated in the "Advanced BlueBio Training Course" titled "**Resilient Blue Bio-refinery technologies: innovative solutions to valorize fishery side streams**" which was organized by NTNU and held in Aalesund.

The BlueBio COFUND seeks to support the expansion aquaculture, fisheries, and food processing by incorporating the latest advancements in ICT (IoT, machine learning, big data) and digitalization, which is a similar goal to the DITECT project. The course featured a diverse range of $\alpha\pi\tau\omega\pi\tau\epsilon\sigma$, presentations from academic experts and representatives of the Norwegian industry. This course served as an excellent platform for sharing knowledge, exploring questions, and networking opportunities.
